Mr. Bob Bear
Operations Manager
Calgary Alberta

Subject: CWS Fiberglass Technology Ltd. Performance

Dear Mr. Bear:

CB&I would like to thank CWS Fiberglass Technology Ltd. (CWS) for their successful shop fabrication of fiberglass reinforced pipe (FRP) lines for the Kearl Expansion Project.

Under subcontract to Horton CBI, CWS's Calgary Barlow Shop fabricated over 4 km of 40 inch, as well as 2 km of smaller bore, FRP module piping spools. CWS was able to fabricate and stay ahead of HCBI's Fort Saskatchewan assembly yard, allowing module assemble to progress as planned.

CB&I found CWS to be proactive and prompt in attention given to quality and technical issues.

We would like to take this opportunity to thank CWS for their excellent services on the Kearl Expansion Project and look forward to use them in the future on other projects.

Sincerely,

Jack A. Brown
CB&I Procurement Director
